14 Websites to Download Research Paper for Free – 2022

Collecting and reading relevant research articles to one's research areas is important for PhD scholars. But for any research scholar, downloading a research paper is one of the most difficult tasks. You must pay for access to high-quality research materials or subscribe to the journal or publication. In this post, I list the top 14 websites to download free research papers, journals, books, datasets, patents, and conference proceedings downloads.

Download Research Paper for Free – 2022

14 best free websites to download research papers are listed below:

1. Sci-Hub

Sci-Hub is a website link with over 64.5 million academic papers and articles available for direct download. It bypasses publisher paywalls by allowing access through educational institution proxies. To download papers Sci-Hub stores papers in its repository, this storage is called Library Genesis (LibGen) or library genesis proxy 2022.

2. Z-Library

Z-Library is a clone of Library Genesis, a shadow library project that allows users to share scholarly journal articles, academic texts, and general-interest books via file sharing (some of which are pirated). The majority of its books come from Library Genesis; however, some are posted directly to the site by individuals. Individuals can also donate to the website's repository to make literature more widely available. Z-library claims to have more than 10,139,382 Books and 84,837,646 Articles articles as of April 25, 2022.

3. Library Genesis

The Library Genesis aggregator is a community aiming at collecting and cataloging items descriptions for the most part of scientific, scientific and technical directions, as well as file metadata. In addition to the descriptions, the aggregator contains only links to third-party resources hosted by users. All information posted on the website is collected from publicly available public Internet resources and is intended solely for informational purposes.

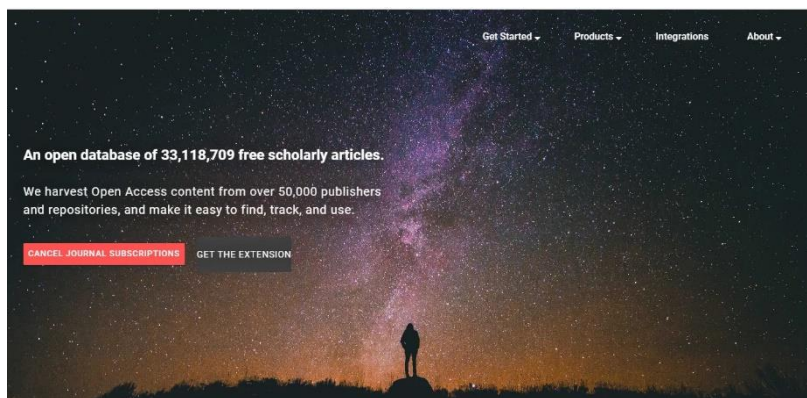

4. Unpaywall

Unpaywall harvests Open Access content from over 50,000 publishers and repositories, and make it easy to find, track, and use. It integrated into thousands of library systems, search platforms, and other information products worldwide. In fact, if you're involved in scholarly communication, there's a good chance you've already used Unpaywall data.

Unpaywall is run by Our Research, a nonprofit dedicated to making scholarship more accessible to everyone. Open is our passion. So, it's only natural our source code is open, too.

5. GetTheResearch.org

GetTheResearch.org is an Artificial Intelligence (AI) powered search engine for search and understand scientific articles for researchers and scientists. It was developed as a part of the Unpaywall project. Unpaywall is a database of 23,329,737 free scholarly Open Access (OA) articles from over 50,000 publishers and repositories, and make it easy to find, track, and use.

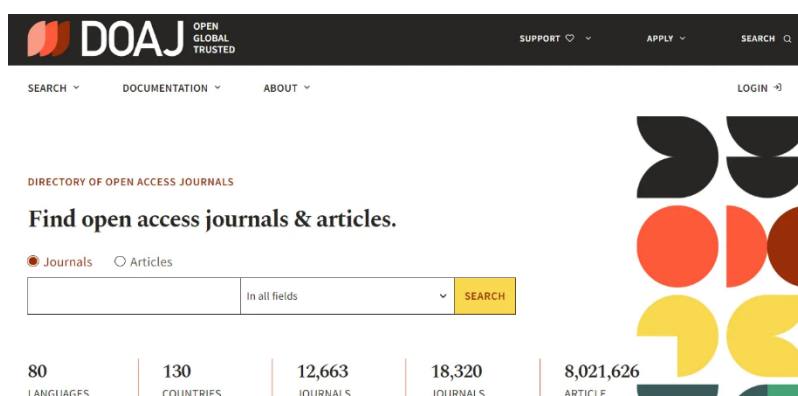

Find and understand peer-reviewed research papers

Try: "vaccines and autism," "How safe is bicycling," or "chocolate"

6. Directory of Open Access Journals (DOAJ)

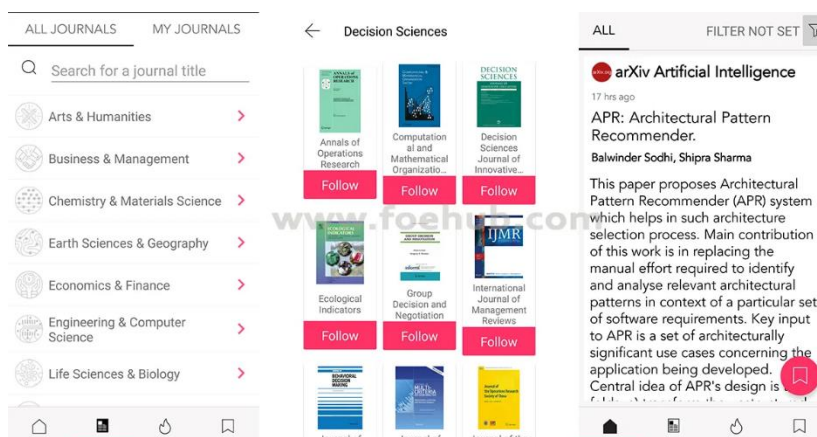

DOAJ (Directory of Open Access Journals) was launched in 2003 with 300 open access journals. Today, this independent index contains almost 17 500 peer-reviewed, open access journals covering all areas of science, technology, medicine, social sciences, arts and humanities. Open access journals from all countries and in all languages are accepted for indexing.

DOAJ is financially supported by many libraries, publishers and other like-minded organizations. Supporting DOAJ demonstrates a firm commitment to open access and the infrastructure that supports it.

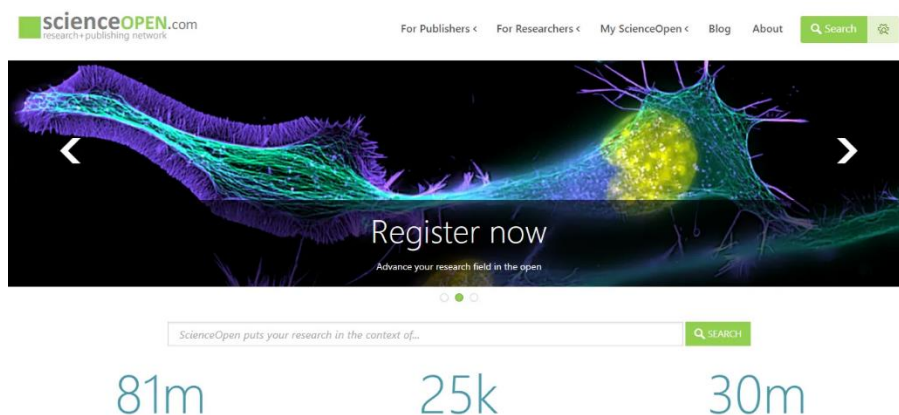

7. Researcher

Researcher is a free journal finding mobile application helps you to read new journal papers every day that are relevant to your research. It is the most popular mobile application used by more than 3 million scientists and researchers to keep themselves updated with the latest academic literature.

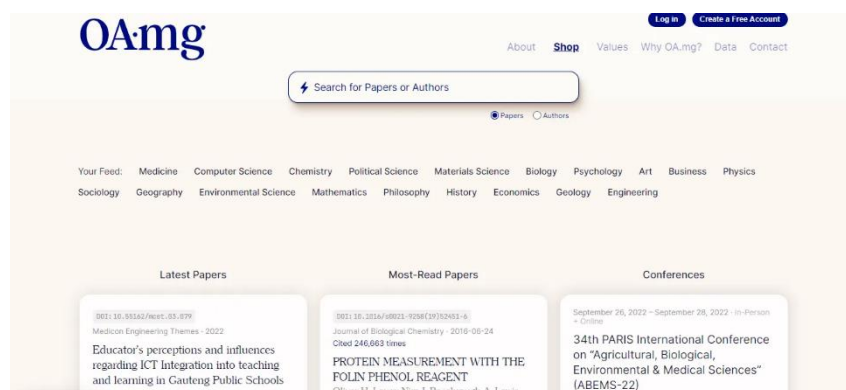

8. Science Open

ScienceOpen is a discovery platform with interactive features for scholars to enhance their research in the open, make an impact, and receive credit for it. It provides context building services for publishers, to bring researchers closer to the content than ever before. This advanced search and discovery functions, combined with post-publication peer review, recommendation, social sharing, and collection-building features make *ScienceOpen* the only research platform you'll ever need.

9. OA.mg

OA.mg is a search engine for academic papers. Whether you are looking for a specific paper, or for research from a field, or all of an author's works – OA.mg is the place to find it.

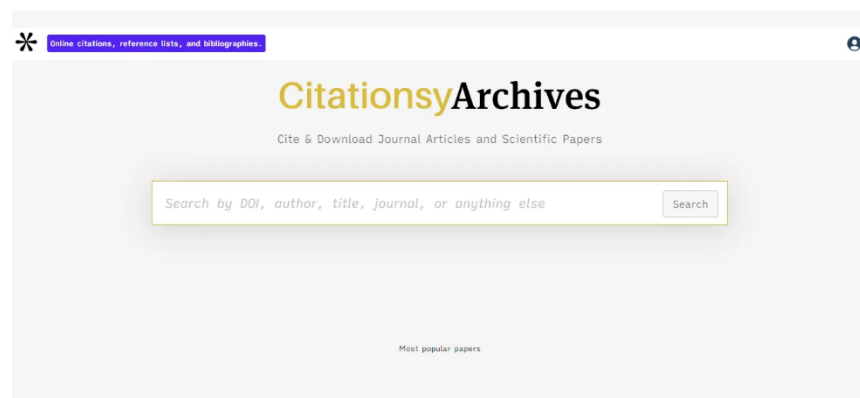

10. Internet Archive Scholar

Internet Archive Scholar (IAS) is a full-text search index that includes over 25 million research articles and other scholarly documents preserved in the Internet Archive. The collection spans from digitized copies of eighteenth-century journals through the latest Open Access conference proceedings and pre-prints crawled from the World Wide Web.

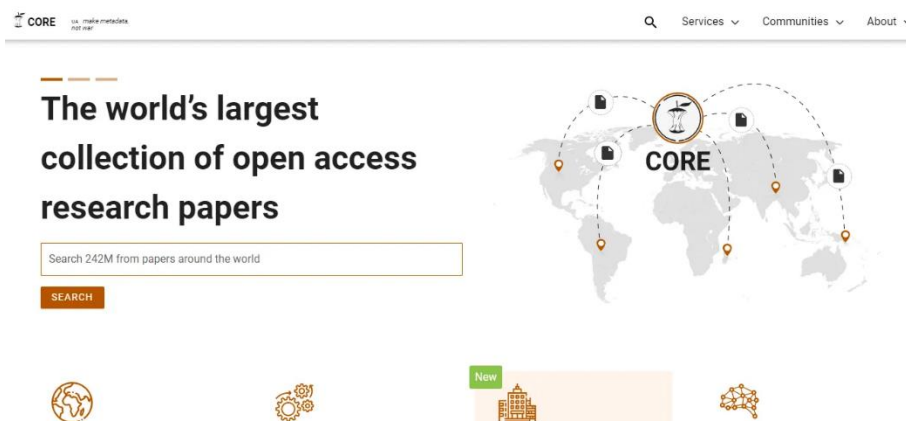

11. Citationsy Archives

Citationsy was founded in 2017 after the reference manager Cenk was using at the time, RefMe, was shut down. It was immediately obvious that the reason people loved RefMe — a clean interface, speed, no ads, simplicity of use — did not apply to CiteThisForMe. It turned out to be easier than anticipated to get a rough prototype up.

12. CORE

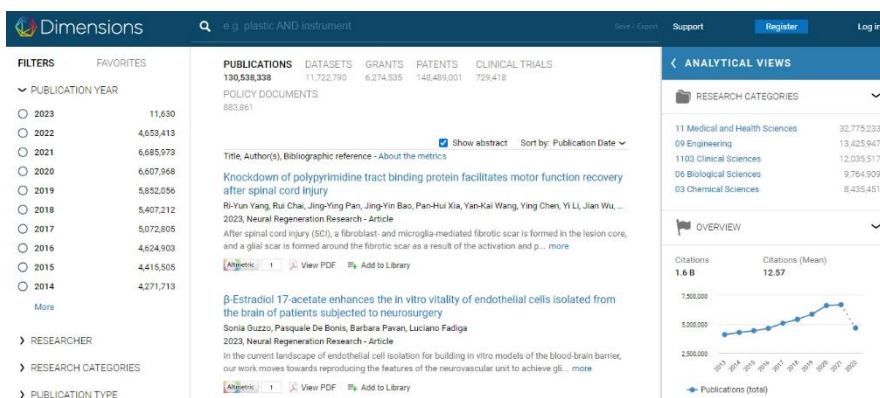

CORE is the world's largest aggregator of open access research papers from repositories and journals. It is a not-for-profit service dedicated to the open access mission. We serve the global network of repositories and journals by increasing the discoverability and reuse of open access content. It provides solutions for content management, discovery and scalable machine access to research. Our services support a wide range of stakeholders, specifically researchers, the general public, academic institutions, developers, funders and companies from a diverse range of sectors including but not limited to innovators, AI technology companies, digital library solutions and pharma.

13. Dimensions

Dimensions covers millions of research publications connected by more than 1.6 billion citations, supporting grants, datasets, clinical trials, patents and policy documents. Dimensions is the most comprehensive research grants database which links grants to millions of resulting publications, clinical trials and patents.

Dimensions includes datasets from repositories such as Figshare, Dryad, Zenodo, Pangaea, and many more. It hosts millions of patents with links to other citing patents as well as to publications and supporting grants.

14. PaperPanda

PaperPanda is a Chrome extension that uses some clever logic and the Panda's detective skills to find you the research paper PDFs you need. Essentially, when you activate PaperPanda it finds the DOI of the paper from the current page, and then goes and searches for it. It starts by querying various Open Access repositories like OpenAccessButton, OaDoi, SemanticScholar, Core, ArXiv, and the Internet Archive. You can also set your university libraries domain in the settings (this feature is in the works and coming soon). PaperPanda will then automatically search for the paper through your library. You can also set a different custom domain in the settings.

Hope, this post would help you to know some of the best website to download the research papers and journals for free.
